PHS Stakeholders,

Each year, Parents, School Personnel, and Students, are asked to participate in the Georgia Health Survey, in order to better secure stakeholder perceptions and feedback, in regard to the safety and social-emotional well being, of our campus.

Historically, survey results are used as part of the calculation process in determining our campus CCRPI (College and Career Readiness Performance Index) score, however, given the challenges of Covid over the last two years, this score has not been calculated for each individual campus.

Although no formal rating will be given, this survey will allow PHS to ensure that we are focusing on items of importance, and we are made aware of things we are doing well and we are told of areas where improvement is needed.

I have included both the website detailing the process and the rationale behind the survey, as well as the Parent Survey itself. Your honest and open feedback will certainly be reviewed by both the State Department of Education and PHS Administration, to best determine how we may serve you, and your child, in the most productive manner.

Thank you for your participation, and as always, “We ARE PHS, and This IS Dragon Country”!
